COSTRUZIONI www.madiscostruzioni.it

INNOVATION AND RESEARCH

Madis research had developed a modular structure of steel frames covered in synthetic shatterproof high tenacity fabric layer, able to ensure outstanding protection from damages and injuries caused by crashes.

UNIVERSAL AND VERSATILE

Due to its lightness, its customizable dimensions and its structural versatility, the Madis Room system can be installed in almost all existing buildings, whatever their construction.

INVISIBLE AND INDESTRUCTIBLE

Madis Room system is the antiseismic solution that combines a maximum level of protection with minimal visual impact and hindrance free home life.

MORE THAN EARTHQUAKE PROTECTION

Madis Room system provides immediate high thermal and acoustic insulation performances. By adding security doors and windows, Madis Room becomes a PANIC ROOM for family and goods in the event of a home invasion. By adding an additional flame resistant fabric layer and fireproof door, Madis Room becomes a place to retreat in case of fire. Because of the incredible strength and stiffness ensured by material properties and structural system, Madis Room is a safe shelter in case of blasts, tornados, terror attacks and other threats.
